10AM–11AM: Hard Tissue Physics

11AM–1PM: Clinical Application of Erbium Laser

2PM–3PM: Lasers in Endodontic

3PM–4PM: Erbium Laser in Implantology
Erbium Demonstration

It is intended to provide and imbibe the use of laser therapy to benefit of patients' experiences and desired outcomes, besides aiming to provide evidence based core knowledge in laser use in dentistry, with hands on experience and will help to students/dentists to try and put to use the technology. It is further a guidance to practitioners to reassure issues of education, competency and quality of care in the use of laser in dentistry.

By the end of the course each of participant shall

- * have an understanding on how lasers work, laser physics, and laser–tissue (hard and soft tissues) interaction
- * have an understanding of the health and safety regulations in using laser in your daily practice
- * be familiar with the laser operating parameters and emission modes
- * have acquired a thorough knowledge of laser delivery systems and power settings
- * be familiar with different types of laser used in dentistry
- * understand how to integrate laser service into you dental practice
